### Aventail and Flowerfire Launch Integrated SSL VPN Advanced Reporting Solution

Joint solution combines Aventail's SSL VPN and Flowerfire's Sawmill Reporting Suite for market-leading user audit and behavior reporting

Seattle, Wash. / Santa Cruz, Calif.— **November 27, 2006** — Today leading SSL VPN technology company Aventail Corp. and Flowerfire Inc., a leading provider of log file analysis and reporting solutions, announced a partnership to deliver an integrated advanced reporting package for Aventail's award-winning SSL VPN. The joint solution combines the secure, remote access capability of Aventail SSL VPNs with Flowerfire's powerful solution to customize and generate comprehensive and customizable reports that meet the requirements of management, IT security, and end users.

Organizations using Aventail's solution have always had the ability to run basic reports, or to export log data into any third party reporting solution. With this new partnership, organizations can now benefit from the Sawmill comprehensive reporting suite, with easy-to-use predefined and customizable reports already integrated with the Aventail logs.

"Through our partnership with Flowerfire, Aventail's customers can take advantage of Flowerfire's Sawmill reporting suite's easy to use, robust reporting capabilities," said Randy Boroughs, VP Product Management, Aventail.

"We are excited to partner with leading SSL VPN vendor Aventail. Sawmill provides the best log data reporting solution on the market, and now Aventail's customers are able to benefit from this solution customized just for them," said Greg Ferrar, CEO of Flowerfire, Inc.

The Sawmill reporting suite includes: customized templates leveraging Aventail appliance metrics; user details such as what data each user accessed and when; session information such as whether users are accessing via the Web or via installed SSL VPN agents.

The joint solution is available now and can be purchased through Aventail. More information can be found at [http://www.aventail.com/products/appliances/add\\_ons.asp](http://www.aventail.com/products/appliances/add_ons.asp)

### About Aventail

Aventail is the best-of-breed remote access company. Aventail delivered the first SSL VPN solution in 1997 and today is a market leader, delivering a remote access control solution that is the easiest to use and easiest to control. Aventail SSL VPN appliances provide users with transparent, clientless access to more applications from more devices via any network environment. For network managers, Aventail delivers a single secure access gateway for all users, internal and external, to all network resources with complete security. With more than 2.5 million end users around the globe, Aventail is the SSL VPN of choice among mid-sized to large-sized organizations worldwide, including AT&T, Chicago Housing Authority, DePaul University, DuPont, the Environmental Protection Agency (EPA), IBM Global Services, James Richardson International, Mississippi Department of Corrections, Organization for Economic Cooperation and Development (OECD), Overlake Hospital, Radiology Ltd., and Sanyo.
